HEMANTH KUMAR KONDUGARI

SENIOR PRODUCT DESIGNER | UI/UX LEAD - PORTFOLIO

12+ YEARS • ENTERPRISE UX • BFSI / FINANCIAL PRODUCTS • COMPLEX WORKFLOWS • AI-ASSISTED DESIGN

+91 94913 83241 | hemanth799@gmail.com | Visakhapatnam, Andhra Pradesh

PROFESSIONAL PROFILE

Senior Product / UI/UX Design professional with 12+ years of experience designing enterprise web applications, financial products, dashboards, customer portals and mobile experiences. Strong background in user-centered design, interaction design, information architecture, wireframing, prototyping, responsive product experiences, design systems and developer-ready handoff.

Experienced in translating complex business requirements into clear user journeys, workflows, review experiences, forms, dashboards and scalable interface patterns. Financial-services experience includes credit and loan journeys, borrower-facing products, compliance and accessibility initiatives, application audits, role-based experiences and operational dashboards.

Hands-on with Figma and Adobe design tools, FullStory-based user behavior analysis, experimentation and A/B testing, and AI-assisted design workflows using Claude, Cursor and ChatGPT. Comfortable partnering with product, business, domain specialists, engineering and QA to validate feasibility, resolve UX issues and move designs toward production.

CORE DESIGN EXPERTISE

- Product UX: User-centered design • Interaction design • Information architecture • User journeys & workflows • Usability & UX strategy
- Enterprise Product UX: BFSI / financial products • Dashboards • Operational interfaces • Forms & tables • Review flows • Role-based experiences • Responsive web & mobile
- Design Delivery: Figma & prototyping • Design systems • Reusable UI patterns • Developer-ready specifications • Design handoff • Design reviews • Stakeholder alignment

SPECIALIZED STRENGTHS

- BFSI, credit and loan application experiences; borrower journeys and conversion-focused UX.
- Complex enterprise workflows, dashboards, customer portals, operational screens and multi-user experiences.
- Accessibility and WCAG-oriented UX improvements across Explore Credit, Clover Credit and Nora Credit.
- Compliance, usability and application audits with practical recommendations for scalable product experiences.
- FullStory user behavior / metrics analysis supporting experimentation and A/B testing aimed at improving borrower acquisition.
- AI-assisted UX workflows for research organization, ideation, UX copy exploration, requirements understanding and design iteration.
- Cross-functional collaboration with product, business, domain specialists, engineering and QA.

TOOLS & DELIVERY

- Design: Figma, Adobe XD, Photoshop, Illustrator, InDesign | UX Analytics: FullStory
- AI-Assisted UX: Claude, Cursor, ChatGPT | Delivery: Design systems, prototyping, specifications, handoff, design reviews, Agile, SDLC, Jira, Azure DevOps

PROFESSIONAL EXPERIENCE

Viveja IT Services | **UI/UX Designer** | Jun 2024 – Present

- Designed UX for loan and financial application journeys, translating business requirements into clear borrower flows, responsive interfaces, review steps and customer-facing experiences.
- Worked across borrower acquisition and conversion-focused experiences, using FullStory user behavior and metrics to identify friction points and inform experimentation.
- Supported A/B testing and experimentation initiatives focused on improving borrower engagement and increasing completed application journeys.
- Designed and improved accessible experiences aligned with WCAG principles, including work across Explore Credit, Clover Credit and Nora Credit.
- Performed application audits covering usability, accessibility, compliance, content governance and process improvements; translated findings into practical UX recommendations.
- Created wireframes, user flows, interaction patterns, responsive layouts and high-fidelity UI designs for web applications and customer platforms.
- Collaborated with product, business, engineering and other stakeholders to balance user needs, business goals, technical feasibility and production constraints.
- Contributed to modernization initiatives and design/implementation reviews, helping teams improve consistency, usability, maintainability and production readiness.

Finexcore | **Senior Technical Consultant – UX / UI** | Dec 2023 – Feb 2024

- Designed UI layouts and visual experiences for banking applications, working with business, marketing and development stakeholders.
- Translated product requirements into practical interface solutions while maintaining usability, visual hierarchy and consistency across banking experiences.

Vensai Technologies | **UI/UX Lead Designer** | Apr 2019 – Sep 2023

- Led UX/UI design within an 18-member team, driving concepts, mockups, wireframes, interactive prototypes and design specifications.
- Defined user flows, navigation structures and interaction strategies focused on user needs, task clarity and efficient journeys.
- Designed responsive dashboards and enterprise interfaces with attention to information hierarchy, consistency and cross-device usability.
- Collaborated with product, development, marketing and stakeholders to convert requirements into polished digital experiences.
- Guided design quality through UX/UI reviews, reusable patterns and practical design direction.

Manuh Technologies | **Senior UI/UX Designer** | Jul 2014 – Apr 2019

- Created user-centered experiences across landing pages, digital campaigns and business-facing interfaces, with a focus on lead generation and engagement.
- Created personas, storyboards, empathy maps, user flows, wireframes and interactive prototypes to understand user needs and goals.
- Developed interaction strategies, navigation structures and alternative interface concepts for different audiences and country-specific experiences.
- Collaborated with clients, development managers and stakeholders to refine requirements and deliver usable, brand-consistent solutions.
- Created style guides and dashboard concepts to improve consistency and strengthen visual and interaction standards.

EDUCATION

- MASTER OF COMPUTER APPLICATIONS (MCA) | Alagappa University | 2016–2021
- BACHELOR OF ARTS (B.A.) | Andhra University | 2008–2012

SELECTED ENTERPRISE & PRODUCT EXPERIENCE

HIVE Financial Services | **UI/UX Lead Designer – Financial Products** | Selected Product Experience

- Worked across HIVE Financial System and financial product modules including Explore Credit, Clover Credit, Nora Credit, Jump Loans, Task Suite and CSR Dashboard.
- Designed user-friendly interfaces, responsive layouts, wireframes and interaction flows for financial and operational workflows.
- Improved navigation, content structure, accessibility, compliance and overall usability across financial product experiences.
- Contributed to application audits and UX improvements spanning accessibility, compliance considerations, content governance and customer-facing journeys.
- Supported role-based access control experiences and operational interfaces, helping accommodate different user needs and permissions.
- Created and refined reusable UI patterns and consistent interface structures across production applications.
- Partnered with product, business and engineering teams to convert complex requirements into practical, scalable UX solutions.

CEVA Logistics – CJF | **UX / UI Enhancement** | Selected Product Experience

- Supported modernization of an enterprise application UI through reusable interface patterns, responsive layouts and usability-focused improvements.
- Worked with engineering teams to resolve UI issues, validate design intent and support consistent implementation across application screens.
- Provided UI guidance and training to help teams adopt reusable interface approaches.

WMG / Wright Maritime Group | **UI/UX – Web-enabled Accounting Application** | Selected Product Experience

- Designed responsive interfaces and business-process-oriented screens for a web-enabled accounting and reporting application.
- Translated approved design concepts into clear, usable application experiences and supported iterative UI improvements.

ENTERPRISE PRODUCT DESIGN ALIGNMENT

- Complex workflows: financial applications, credit/loan journeys, operational tools, dashboards, portals and business-process screens.
- Data and decision support: dashboards, review-oriented interfaces, structured content, user metrics and behavior analysis.
- Governance & accessibility: WCAG-oriented improvements, accessibility audits, compliance considerations and content governance.
- Design systems: reusable UI patterns, style guides, consistent navigation, interface standards and scalable design handoff.
- AI-assisted design: practical use of Claude, Cursor and ChatGPT to accelerate UX exploration, requirements understanding, ideation, copy alternatives and iterative design work.
- Engineering partnership: developer collaboration, feasibility discussions, design specifications, implementation review and cross-functional Agile delivery.
- Product thinking: balances user needs, business outcomes, usability, accessibility, consistency and delivery constraints across enterprise products.

CAREER SNAPSHOT

- 12+ YEARS — UX / Product Design
- BFSI / FINANCIAL — Credit • Loans • Banking
- ENTERPRISE UX — Workflows • Dashboards • Portals
- AI-ASSISTED — Claude • Cursor • ChatGPT
