Mobile Applications

I specialize in crafting captivating and user-centric web application designs that seamlessly Blend aesthetics with functionality. With a keen eye for detail and a deep understanding of user experience principles, my work focuses on creating intuitive and visually appealing interfaces. By combining the latest design trends, responsive layouts, and effective information architecture, I strive to enhance user engagement and drive positive interactions. My design process involves collaborative brainstorming, wire framing, prototyping, and iterative refinement to ensure that the end result not only meets the client's objectives but also delights and satisfies the end users. Through my work in web application design, I aim to transform complex ideas into user-friendly digital experiences that leave a lasting impact.

PERFECT CHAUFFEUR

About the project:

Perfect Limo Service, Inc., has been serving the ground transportation needs of New Jersey/ New York metropolitan area residents for more than three decades. From base in the historic Octagon House in Montvale, New Jersey, we have convenient access to the entire New York, New Jersey and Connecticut areas. Through the affiliates, to handle virtually every type of transportation assignment locally, nationally and around the globe. Had a long list of clients, ranging from top Blue Chip corporations to individual travelers, brides, and people celebrating special events. Chauffeurs are knowledgeable and experienced.

Perfect Chauffeur contains three applications intended for Driver, Customer and Affiliate Driver.

- Driver App handles all the trip related details and customer information and location of the waypoints, customer, destination and updates regarding the trip.
- Customer App helps the user in tracking the Driver location and time estimate of the trip and driver and limo details of the trip.
- Affiliate App comes in handy in the absence of the Driver or when the company wants to share their drivers with company.
